

Science in action

Marsh Green Primary School

What is science?

KS1 - Science is how we find out about the world around us.

KS2 - Science is the study of the physical and natural world through observations and experiments.

Science Week 2025 Change & Adapt Year 4 Falcons

We went out into our Forest School to investigate local habitats.

We saw a range of different animals, such as; slugs, worms, spiders and birds.

We noticed that some animals lived in dark damp habits but would move away from danger when threatened leading to a change in their habitats.

We predicted that birds would return to our Forest School when the trees have grown more leaves and berries. They will change their habitat to find more food.
